

MEDICAL DATA READY FOR THE FUTURE

JiveX HEALTHCARE
CONTENT
MANAGEMENT

www.visus.com

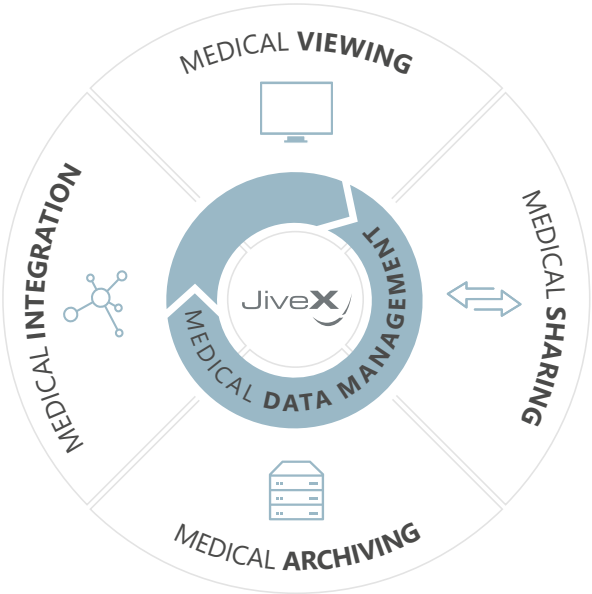

A photograph showing two healthcare professionals, a man in a light blue shirt and a woman in a white lab coat, looking at a large computer monitor. The monitor displays a complex medical data interface with various charts, tables, and images. The woman is pointing at a specific area on the screen. In the foreground, there is a keyboard, a mouse, and a clipboard with a document. The background shows a window with blinds.

**MEDICAL DATA
IN FULL VIEW**

JiveX Healthcare Content Management consolidates medical data within a single system. All information on a case or patient is available at a glance and can be integrated into diagnostic or therapeutic decisions. This increases the quality of patient care while optimizing efficiency in healthcare institutions.

The individual components of the healthcare content management system ensure maximum data use for the benefit of the patient.

JIVEX COMPONENTS

ORGANIZE DATA SYSTEMATICALLY

Medical data always up to date

- ▶ Medical data always available at the right place
- ▶ Intelligent authorization concept
- ▶ Structured processing of data
- ▶ Structured search

Integrate medical data

- ▶ Manufacturer-independent incorporation of documents, biosignals, images, structured data or videos, and conversion into standard medical formats, such as DICOM or PDF/A
- ▶ Secure patient-, case-, or order-related data integration through gateways
- ▶ Comprehensive processing of metadata, including completion of missing data
- ▶ Support for proof and revision security processes already during data input through the use of qualified electronic signatures and time stamps

View all medical data together

- ▶ Display of all medical data in single web-based zero-footprint viewer
- ▶ Merging of all medical data for a given person or case
- ▶ Representation of data according to a facility's file structure
- ▶ Automatic, intelligent filtering for clear, individualized representation of all medical data
- ▶ Custom display options

Share and communicate medical data

- ▶ Easy sharing of data and medical records with patients and doctors
- ▶ Personalized access for referrers to authorized data
- ▶ Support for data transfer to all common media
- ▶ Seamless integration into existing portal solutions

Manufacturer-neutral archiving of medical data

- ▶ Support for all common storage infrastructures for long-term archiving of medical data
- ▶ Automated archive management of various medical data types, taking access times and retention periods into account
- ▶ Hierarchical archiving with rule-based data replication
- ▶ Tools for ensuring data consistency throughout the retention period
- ▶ High availability

JiveX Healthcare Content Management provides all components for fully integrating, processing, archiving, and sharing medical data within a single system.

HEALTH INSPIRES US

We are digitizing healthcare for the benefit of all, and our JiveX products play an important role in the delivery of healthcare services worldwide.

Digitalization is the key to greater connectivity and a better, more targeted exchange of information between healthcare professionals – because better information means greater precision in diagnosis and treatment. In order to effectively raise the level of digitalization, our JiveX products offer superior interoperability, scalability, and user-friendliness.

We are your reliable partner for managing medical data.
