## MEDICAL DATA MANAGEMENT

Preparing and organizing medical data

JiveX Medical Data Management is a set of tools to provide medical data in its latest version and at the right place at any time. Additionally, it provides a highly searchable structuring of the data for all authorized users.

### MEDICAL INTEGRATION

#### Integrating medical data

- ▶ Vendor-neutral acquisition of documents, biosignals, images, structured data or videos and conversion into standard medical formats such as DICOM and PDF/A
- ▶ Reliable patient-, case- or order-related data integration using gateways
- ▶ Comprehensive processing of metadata up to including missing information
- ▶ Support for processes to ensure evidence and audit-proofing through qualified electronic signatures and time-stamps as soon as data is received

### MEDICAL VIEWING

#### Examination of all medical data in one place

- ▶ Display of all medical data in a single web-based zero footprint viewer
- ▶ Consolidation of all medical data regarding a patient or case
- ▶ Display of the data analogous to the respective filing structure of an institution
- ▶ Smart filters for intuitive, user-oriented presentation
- ▶ Individual customization of presentation options
- ▶ Usage as IHE XDS consumer

### MEDICAL SHARING

#### Sharing and communicating of medical data

- ▶ Effortless distribution of data to patients, physicians or other entities
- ▶ Secure login-based access for referring physicians
- ▶ Support for data transfer to all current media
- ▶ Seamless integration into existing portal solutions
- ▶ Support of medical controlling workflows
- ▶ Health information exchange based on standards such as IHE XDS and FHIR

### MEDICAL ARCHIVING

#### Vendor-neutral medical data archiving

- ▶ Supports all current storage infrastructures for long-term archiving of medical data
- ▶ Automated archive management of various medical data types, taking into account access times and retention periods
- ▶ Hierarchical archiving with rule-based data replication
- ▶ Tools to ensure data consistency over the entire retention period
- ▶ High availability

# JIVEX HEALTHCARE CONTENT MANAGEMENT

## Systematic organization of medical data

JiveX Healthcare Content Management (HCM) provides all the components for integrating, processing, archiving and distributing medical data holistically within one system. Due to its high integration capability into other primary systems, such as the HIS/EMR, a seamless communications loop is created which significantly optimizes treatment safety and efficiency in healthcare facilities.

JiveX Healthcare Content Management is the consolidated basis for health information exchange.
